Requirements and Features not implemented in the website:

- Advanced features can be implemented to complement already existing search functionality to filter better results for the users.
- These features can be implemented in a visual form as filters based on type, distance and time on the property map itself.
- Also filters based on price, proximity to public transport and other transport services etc.
- Advanced algorithms can also be used to predict future scores and provide better suggestions to users based on previous likes and dislikes.
- Better user authentication to prevent spread of fake news can also be implemented.
